## International Armoured Vehicles

### CLOSE-UP: INTERNATIONAL ARMoured VEHICLES

To mark the International Armoured Vehicles Conference held in London from 22 to 25 January 2018 as the world's premier armoured vehicles forum, European Security & Defence will publish a special pre-print supplement (circulation: 1,000) with advanced distribution at the event. Subsequently, this supplement will be part of the regular February 2018 issue with a global circulation of more than 15,000.

#### European AFV Programmes

To the same extent that main battle tanks have grown in terms of size, weight, firepower and top speed the armoured infantry's mechanised combat vehicle fleets have to respond to increased and more demanding requirements. A number of European armies are in the process of modernising their AFV fleets. The article looks at programmes and contenders.

#### 6x6 SITREP

Thousands of armoured 6x6 vehicles are currently in global use and serving for a wide range of different applications including APC, reconnaissance, anti-tank, air defence artillery, ambulance, and others. A look at today's equipment status, upgrade and modernisation efforts.

#### Remotely Controlled Weapon Stations

Personnel protection has become one of the key issues for all first-tier armies. Numerous systems have seen a considerable increase in their market, as they ensure considerable casualty reduction. Remotely Controlled Weapon Stations (RCWSs) are definitely examples of such systems. Their market, according to some analysts, will increase from US\$6.28 billion in 2016 to US\$12.70 billion in 2022, thus doubling its figures within six years with a compound annual growth rate (CAGR) of 12.47% during the forecast period. The article looks at systems in use, requirements and development trends.

#### Armoured Ambulances

Evacuation of casualties is a fundamental aspect of medical support. Movement of casualties is not just transportation to a suitable Medical Treatment Facility (MTF) but is part of a continuum of patient treatment and care, and is therefore, a medical responsibility. At no point in the chain of evacuation must the level of care be reduced below that received at the previous MTF. Modern protected ambulances make an essential contribution to this requirement. Systems in use, designs, programmes.

#### Discreet Uparmouring of Commercial Vehicles

With changing threats worldwide the security operatives, from special forces mounting covert ops to small security teams routinely operating in potentially hostile regions, need suitable vehicles, protected and discreet, that will keep them safe as they go about their daily business.

#### Other subjects include:

- Mobility vs. Protection
- Electric/Hybrid Technology Options for AFVs
- AFV Self-Defence Systems

#### LAND 400: Australia's Army Modernisation

Australia's LAND 400 programme aims to procure a new land combat vehicle system consisting of a Combat Reconnaissance Vehicle (CRV), an Infantry Fighting Vehicle (IFV), a Manoeuvre Support Vehicle (MSV), and an Integrated Training System (ITS). The total cost of LAND 400 is estimated at 20 billion Australian Dollars (AUD).

## Bonus Distribution:

## CLOSE-UP: INTERNATIONAL ARMoured VEHICLES

**Advertising Reservation Deadline: 09 January 2018**

**Special pre-print supplement with advanced distribution at the International Armoured Vehicles Conference, London**

Editorial includes: Mobility vs. Protection, Scout and Liaison Vehicles, AFV Self-Defence Systems, European AFV Programmes, 6x6 SITREP, Armoured Ambulances, Weapon Stations, Propulsion Options, Discreet Uparmouring, Land 400 Assessment.

**Advertising Copy Deadline: 12 January 2018**  
**(Pre-) Publication: 22 January 2018**

## Technology Focus: New Police and Military Personal Weapons & Ammunition Developments

To mark this year's IWA/EnforceTac exhibitions in Nuremberg, Germany, this issue will present a series of articles focussing on state-of-the-art technology, trends and requirements in the segment of hand weapons and ammunition for the individual soldier (pistols, assault and sniper rifles, submachine guns, grenade launchers) as well as dedicated weapons and ordnance for police forces.

articles focussing on state-of-the-art technology, trends and requirements in the segment of hand weapons and ammunition for the individual soldier (pistols, assault and sniper rifles, submachine guns, grenade launchers) as well as dedicated weapons and ordnance for police forces.

## Joint Forces/Land

- **Joint Fire Support Trends**  
Joint fire support is defined as joint fires that assist air, land, maritime, and special operations forces to move, manoeuvre, and control territory, populations, airspace, and key waters.
- **Personal Equipment - Body Armour**  
Technology, Trends, Perspectives

## UAV/UAS/RPAS

More than 600 types of UAS are currently in use in eighty nations. In this issue this interest segment is addressed in a series of expert articles:

- **UAVs in European Service**
- **Tactical UAV Requirements**
- **UAS Detection and Countermeasures**

Programme Subject to Modification

## Forecast: India and Europe

In the scope of the "Make in India" campaign the Indian Government's objective is to extend the local production share throughout the industrial capability spectrum and also covering defence materiel requirements and programmes. Now that the Indian Armed Forces appear to be in the market for quite a number of European offers, this article assesses the industrial perspectives.

## Air

- **The Swedish Air Force**

Same as other European air forces the Swedish Air Force plans for their next generation fighter to be fully

operational from 2027. The article considers the current status and looks at plans and programmes.

- **Multi/Special Mission Aircraft**
- **Helicopter-borne Weapons**
- **Air Droppable Armour**

## Sea

- **MCMV Global Programme Review**
- **Refugee Rescue at Sea**

The rescue of refugees is a new element of the operational profile of several European navies. As a result, dedicated ship and boat designs are under consideration.

- **Naval Ground Attack Missiles**  
The engagement of targets ashore has become a standard capability requirement for modern navies. A market survey.

## Training & Simulation

- **Small Arms Training**
- **Mortar Training and Simulation**
- **Simulator Display Systems**

## Technology

- **Mobile Ad-Hoc Networks**
- **Command & Control in Civilian Environments**
- **CBRN (1); Stand-off Detection**
