Technology Focus: Guided Missiles

In today's terminology a missile is a self-propelled precision-guided munition system. Guided missiles constitute effectors of choice for all branches of the forces, both for defensive and offensive employment. In a series of articles ESD looks at the state-of-the-art technologies implemented for anti-armour, surface-to-air, air-to-air, air-to-ground, naval air and missile defence, anti-ship, land attack and BMD applications.

Dutch-Belgian Naval Cooperation

Based on an MoU signed by the defence ministers of both countries at the end of last year, the Belgian Navy and the Royal Netherlands

Navy will replace their existing mine countermeasure vessels and frigates with vessels of the same type. Plans and perspectives.

Eurofighter TYPHOON Programme Update

Europe's largest defence procurement effort, the Eurofighter TYPHOON weapon system, has been subject to continuous upgrade and modernisation measures, mainly comprising improvements to the fighters' sensor and weapons fit. ESD looks at current activities, both in Europe and on export markets.

Protection Concepts for Naval Vessels

As a rule, the protection concepts for the ships and boats of naval forces are worked out according to the conventional requirements of signature reduction, assertiveness and combat effect. Asymmetric threats have spawned additional conceptual considerations. Principles and trends.

Ground-Based Radar

Military implementations of radar technology are highly diverse, including surveillance and reconnaissance, target acquisition, flight control and missile guidance. This article looks at the state-of-the-art of radar technology for land forces.

Programme Subject to Modification

Country Focus: Defence and Security in BELGIUM

In ESD's series of country portraits of European and friendly nations this issue will feature Belgium's

- Defence Policy
- Armed Forces: Challenges and Missions
- Defence Procurement Structures and Programmes
- Defence Industrial Base

Defence Industry in the Netherlands

Despite its relatively small size the Dutch defence industry supplies the majority of equipment items to the country's armed forces. While the Netherlands' defence industrial base might only have the capacity to execute part of the MoD's capital materiel programmes independently, they have proven skills and expertise to make essential contributions to such efforts.

Defence Programmes and Requirements in Malaysia

To mark this year's International Maritime and Aerospace Exhibition on the Malaysian island of Langkawi this article provides a survey of the country's current military programmes, requirements and forthcoming procurement efforts in the naval and aerospace domains.

The Brazilian Air Force

As part of the requirements formulated in the scope of the "Plano Brasil 2022", one of the objectives is to ensure total surveillance and control of Brazil's entire air space. Against this background the article considers the Brazilian Air Force's current capabilities and planned equipment status.

SIPAM/SIVAM - Protection for the Amazon Area

To execute protection for the politically and strategically relevant Amazon area the Brazilian Government is setting up the SIPAM/SIVAM control and surveillance system, which comprises both sensor elements and administrative planning and coordination functions.

Other subjects include:

- The Croatian Armed Forces
- Vehicles for Special Forces

European Security & Defence (ESD)

“European Security & Defence” (ESD) addresses an international readership in more than 100 countries with aspects of European defence and security policy, the armed forces, armament/procurement, and industry. As an unbiased periodical ESD considers questions of international relevance at political/parliamentary, military, technological and industrial levels. The magazine is supported by renowned and expert authors from politics, the military, public administration and acknowledged scientific institutions. ESD is published 8 times in 2017 with an additional special issue addressing the subject of “Defence Procurement in Germany”. Since January 2015, ESD has been accompanied by “ESD Spotlight”, a fortnightly online newsletter in English.

In terms of readership ESD reaches broadly 25% industry, 60% military and 15% “other” categories, and within those categories is most frequently received (initially) in the Major-to-2-Star General (or equivalent) bracket. The pass-along rate is assessed as being between 5 and 7 readers per copy.

Distribution

Circulation: 14,515

ESD is also available in e-paper format

Readership Profile
