### TECHNOLOGY FOCUS:

#### NAVAL COMMAND & CONTROL

As **Official Lead Media Partner** for Undersea Defence & Security (UDS) Exhibition and Conference, ESD reports on the latest developments in:

**Naval command & control systems:** the state-of-the-art for air defence, surface and underwater warfare C<sup>2</sup>.

**Stealth at Sea:** latest techniques and technology to avoid detection and identification in the visual, acoustic, thermal and RF spectra.

**Remotely Operated Vehicles:** naval unmanned systems: missions, requirements, plans and programmes.

**RHIBs:** Rigid hull inflatable boats are tough, versatile and fast: a look at missions, designs, development and equipment... And alternatives.

**Ship Protection Concepts:** passive and active defence against aerial, surface and sub-surface attack: principles and considerations.

**LCS SitRep:** Achievements to date; challenges ahead: operational / commercial potential: a status report.

#### The Polish Navy and Naval Industry.

30 new ships. 22 modernisation programmes. US\$3.2Bn. An update...

#### New Investment in Spanish Defence:

New frigates, jets, trainers, 8x8s, helicopters, C<sup>2</sup>... Can the plan be sustained, and by whom?

**Ukraine:** With no money, but grim determination, Defence and Security Reforms in Ukraine advance...

#### SOFTWARE-DEFINED RADIOS FROM AND FOR EUROPE

Europe has the technology: where's the lead?

#### FORECAST: MALAYSIA & EUROPE

Malaysian military and police equipment is a broad mix of indigenous, Asian, American, European and Russian systems. ESD considers the relationship between Malaysian industry and its European partners, and Malaysia's defence and police programmes and their European suppliers.

**Ground-Based/Battlefield Radar.** Tactical battlefield radar is surely now obsolete—or is it? New sensors and new technologies such as passive radar mean that silent detection by radar is available—and necessary.

#### US Army Armoured Systems

**Programmes:** Potential enemies have achieved "parity" according to the USA: ESD presents a Sitrep and trend analysis of major US armour from Abrams through artillery to AMPV.

#### Field Camp Technologies and

**Operations.** Establishing and running a field camp is a black art: ESD sheds some light on technologies for mobile cities.

#### NETMA

An Interview with the General Manager of the NATO EUROFIGHTER and TOR-NADO Management Agency, NETMA, **Lt.Gen. Gabriele Salvestroni.**

#### EUROFIGHTER TYPHOON EXPORT

**UPDATE:** Austria, Kuwait, Oman, Qatar, Saudi Arabia - Who's next in the market for Europe's largest defence programme?

#### AIRBORNE SITUATIONAL AWARENESS

What is the future for today's manned platforms and their sensor fits? Is there a future for our current icons?

#### UAV OPERATOR SIMULATION AND TRAINING

Demands are high and growing, both for and upon UAV pilots. Who/What provides the solutions?

Programme may be subject to alteration without notice
